MOTOROLA TALKABOUT® T9500 TWO-WAY RADIO SERIES

The Motorola Talkabout® T9500 is the ultimate communication tool for the serious outdoor enthusiast. With a range of up to 25 miles* and loaded with every possible radio feature, you know that with the T9500, you are ready for the extreme outdoors.

Lightweight and rugged, with side grips to help you hold on, the T9500 is built to handle any challenge without weighing you down.

NOAA WEATHER CHANNEL

Want to know where the best conditions are for your rock climbing outing? Tune into one of 7 NOAA channels (National Oceanic and Atmospheric Administration) on your T9500 for continuous local and regional weather broadcasting. And when you are out having fun, weather alerts will provide you with warnings of incoming weather to protect you from the dangers of a sudden storm.

EXTRA POWER WHEN YOU NEED IT MOST

Push-To-Talk Power Boost, when activated, allows you to extend the transmission range by increasing the transmitter power output while saving battery life when no power boost is necessary.

HANDS-FREE COMMUNICATION

In the middle of a mountain bike trail, you really don't want to take your hands off the handlebars. Enter iVOX. Acting as a speakerphone, the iVOX hands free communication allows you to use your hands for other activities while keeping in touch.

SILENT SIGNALS

The VibraCall™ silent vibrating ringer is especially useful for locations where ringing can be intrusive. This feature is also great when noise from a sporting event would drown out your ring tone.

COMPANDING

The T9500 has a Motorola exclusive feature —“companding”— a sophisticated technology that filters out static between words. This allows the radio to deliver noticeably clearer transmission.

PRICING

Manufacturer's Suggested Retail Price is \$79.99 per pair. Also available: Model T9550XLR CAMO, with MSRP \$89.99 per pair.

*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference and obstructions. See www.giantintl.com/range for further details.
